## Natural Biologics, Inc. Names Two New Directors to the Board

January 15, 2021, Newfield, NY - With rapidly growing domestic business, new product innovations ready to launch and expanding export opportunities, Natural Biologics' Board of Directors voted recently to expand the board to leverage additional expertise and oversight. The company welcomes Dr. Dana Putnam and Dr. Joshua Jackman to the Board of Directors.

[Dr. Jackman](#) is an Assistant Professor in the School of Chemical Engineering at Sungkyunkwan University (SKKU) in South Korea. His work is focused on understanding how anti-infective compounds inhibit viruses and bacteria across human healthcare and agricultural biosecurity applications. He is a co-inventor on patents for antiviral peptides against Zika and Dengue viruses and has successfully licensed his innovations to pharmaceutical and biotechnology companies. Before starting his faculty career at SKKU, Josh was a Postdoctoral Scholar in the Division of Gastroenterology and Hepatology at the Stanford University School of Medicine. He earned his B.S. degree in Chemistry from the University of Florida and his Ph.D. degree in Materials Science and Engineering from Nanyang Technological University in Singapore. As an independent director, Josh will bring great rigor and depth to the oversight of Natural Biologics' research and innovation strategy.

[Dr. Putnam](#) is a founder and co-owner of Finding Home Farms, a retail maple syrup and home goods business he started with his wife seven years ago. During much of that time, Dana was also the principal at Spearhead Solutions, a strategy, business development and M&A consulting firm. Prior to entering business for himself, Dana spent nearly fourteen years with the Balchem Corporation, rising from Commercial Development Manager to Vice President and General Manager of the Animal Nutrition Division. As a second independent director, Dana's expertise in M&A, product licensing and the animal health industries will be valuable to the implementation of the company's innovation strategy.

Dana and Josh will join existing directors [Tevya Ware](#), the CFO of Operation Underground Railroad, and John Mitchell, former owner of I.L. Richer Feed Company, along with company founder and President, Dr. Charlie Elrod.
